

sonnenBatterie Evo Installer Training.

About the course:

This course provides skills and technical knowledge required to design, install and commission sonnenBatterie Evo. The training includes product technical specifications, operational concept, and instructions to install and commission the storage system according to both sonnen's guidelines and the Australian standards and regulatory requirements.

Upon successful completion of this module, learners will be authorized to install and commission sonnenBatterie Evo system. Learners will receive a sonnen certificate of completion stating their unique sonnen installer accreditation number.

Prerequisites:

It is assumed that the learners have existing knowledge of grid-connected PV systems and battery energy storage systems. It is assumed that they hold a Clean Energy Council Grid-Connect and battery storage accreditation.

All sonnen systems must be installed by authorised electricians who hold unrestricted electrical license. The electrician must be a person with a technical knowledge or sufficient experience to enable him/her to avoid dangers which electricity may create.

Delivery Mode:

This is an online course with short online assessments at the end of each topic.

Duration:

This course will take up to 90 minutes to complete. This is a self-paced course, so the duration may vary.

Course outline:

- Overview of sonnenBatterie Evo
- System Components
- Operation Concept
- Scope of Delivery, Mounting and Installation
