A Unique Company with Proven Success.

At sonnen, our mission is clean, reliable and affordable energy for all. As a global leader in clean energy management technology, our unique value lies in delivering innovative solutions that create enhanced value for you and your clients.

Global Leadership.

- Founded in 2010 with focus on energy management
- 50+ global awards
- 60,000+ global installs

Guaranteed Product Superiority.

- Safest, longest-lasting technology
- Industry leading warranty – up to 15-years/15,000 cycles
- Up to 371 MWh expected lifetime energy*

Global Innovation.

- German engineering + American ingenuity
- Leader in smart home energy automation technology

*MWh shown are for the ecoLinX 30 solution. Actual MWh throughput varies by sonnen product. It is calculated using a linear decreasing capacity of 70% over the warranty lifetime.

A Sustainable Solution that Adds Real Value.

Value for You.

- Differentiate your business with eco-forward, sustainable energy solutions
- Enhanced home value for your clients
- Contributes to energy-efficiency standards (LEED, Netzero and more)
- Partner support and project design tools to guide you every step of the way

Value for Your Clients.

- Better use of solar investments by storing excess sunlight for use at night or during outages
- Safest, long-lasting protection from power outages
- Potential to reduce energy use and lower electricity costs
- Smart energy automation for dynamic energy control
- Healthy, eco-forward lifestyle

A Blueprint for Clean Energy Residences.

With over 10 years of experience developing high-quality energy management solutions, sonnen products use safe, recyclable, and cobalt-free lithium iron phosphate batteries. And because our residential products are flexible in size and functionality, we have a solution for every unique project and customer.

sonnenCore - simple, sleek, affordable.

- Single 10kWh capacity with 100% sonnen design
- Basic backup for essential needs
- Easy, repeatable design and install
- Ideal for any home
- 10-years / 10,000 cycles warranty

ecoLinx - elegant, effortless, connected.

- Scalable 12-20kWh or 30kWh capacity
- Integrates with leading automation platforms for dynamic energy management and backup power
- Ideal for custom homes
- Includes Virtual Power Plant software
- 15-years / 15,000 cycles warranty

“In ten or fifteen years, sonnen is going to be as common as a washer or dryer. It’s going to be part of the landscape. Now there are [clean energy and energy efficiency] mandates; these are things that must be embraced. We see ourselves as designers – as the frontline of introducing these technologies to the consumer. We are that bridge we show them why it works.”

Robert Platt, Habitations, LLC
Principal and Senior Project Designer

Together we can design homes powered by clean energy that enhance your business, deliver greater client value, and create a foundation for a sustainable energy future.
