Electricity key contract features					
Cooling off period		10 business days.			
Eligibility		Residential customers in the distributor area must have the Minimum solar PV capacity and Minimum sonnenBatterie useable capacity for the relevant sonnenFlat plan.			
Adjusted Annual Usage Allowance		Each household must produce the Minimum Annual Generation quantity of energy over a 12-month period. Where the annual energy production falls below the Minimum Annual Generation , the Annual Usage Allowance will be reduced proportionally to the shortfall in the Minimum Annual Generation . e.g.: For sonnenFlat Economy , if actual annual solar production is 6,000 kWh, then the Adjusted Annual Usage Allowance is => 6,500 x 6,000 / 6,050 = 6,446 kWh.			
Excess Usage Rate		Once the Adjusted Annual Usage Allowance is exceeded, subsequent <i>usage from the grid</i> will be charged at the Excess Usage Rate .			

Solar feed-in Rate	Energy exported above the Annual Export Threshold will be paid at the Solar feed-in Rate .
Early termination	Annual Usage Allowance and Minimum Annual Generation will be reduced pro-rata where a customer ends the agreement within a 12-month period.
Metering	Measurements from sonnenBatterie meters and regulated NMI meters will be used to determine Annual Usage Allowance and Minimum Annual Generation . Measurements from NMI meters will be used to determine exported energy and excess grid usage . Regulated NMI meters must be interval meters.
Battery Operations	sonnen may operate the sonnenBatterie remotely at its sole discretion.
