Enhance Your Home With sonnen Intelligent Energy Storage

sonnen's mission is to provide clean and affordable energy for all. The all-in-one sonnen ecoLinX intelligent energy storage solution works with solar systems, leading automation platforms, and controllable breakers to give you the ultimate **clean energy smart home and true energy automation**. By storing and using excess solar energy, this smart system will manage and maximize energy to power your home in the cleanest way possible while also keeping you powered and protected during grid outages.

The sonnen Difference

Since 2008, sonnen has been an innovator and global leader in intelligent energy storage solutions that help you reach your goal to use clean, reliable and cost-effective energy. What makes sonnen unique is our proven ability to provide best-in-class, clean energy products and services that are easy to use.

Powering Your Smart Home with sonnen ecoLinX & Energy Automation

By pairing ecoLinX with an automation platform,* your home will actively monitor and manage your daily solar production, storage usage and energy needs to:

- **Maximize the use of your clean solar energy** by storing excess solar for use at night
- **Reduce your carbon footprint** by using “locally grown” stored sunlight to power your smart home
- **Send inclement weather alerts and automatically increase your backup power reserve** in preparation for a potential outage
- **Keep the lights on** and your solar working during power outages
- **Provide smart, configurable backup power options**, allowing you to dynamically choose how to use your battery reserve
- **Help manage your electric bill** by reducing use of the grid during expensive peak times
- **Monitor and manage** your household energy usage with the sonnen and/or automation platform app
- **Increase your independence** from the utility grid
- **Automatically manage and maximize your daily clean energy usage** to power your eco-forward lifestyle

Safety and Performance

- All-in-one design works with new/existing solar systems and leading automation platforms*
- Available storage capacities include 12 - 20 kWh and 30 kWh
- Highest in quality with a 15 year /15,000 cycle sonnen ecoLinX warranty
- sonnen web portal and app provide real-time solar production and energy storage usage data to help you monitor and manage energy usage
- Software upgrades minimize system maintenance and future-proof your home against energy uncertainty

- Safest, longest-lasting battery chemistry – certified to UL standards

For Everyone, Everywhere

The sonnen ecoLinX is sold exclusively through a network of trusted partners that will help you determine the best storage solution for your home based on your household energy needs. Then, they will work with you to install, commission and service your system.
