

The sonnen difference.

At sonnen, we take pride in delivering a solution that not only provides the quality you expect, but also delivers on our vision of clean and affordable energy for everyone.

The sonnenCommunity is a collective of people who generate and store clean energy with their smart sonnenBatterie. Our members are able to share their energy with other members by joining a sonnenFlat energy package. By sharing this energy, members can significantly reduce their energy costs whilst also providing grid stability in times of need.

The sonnenFlat Energy Plan.

sonnenFlat Energy Plans

	City	Economy	Family	Autonomy
Price	\$49 /month	\$49 /month	\$59 /month	\$69 /month
Annual household usage allowance	4,000 kWh	7,500 kWh	10,000 kWh	12,500 kWh
Min. solar PV	3 kWp	5 kWp	7.5 kWp	10 kWp
Usable battery capacity	4 kWh	8 kWh	10 kWh	12 kWh

Includes  • sonnenCommunity membership • No lock-in contracts or exit fees • Feed-in-rate available* • Supply charge included

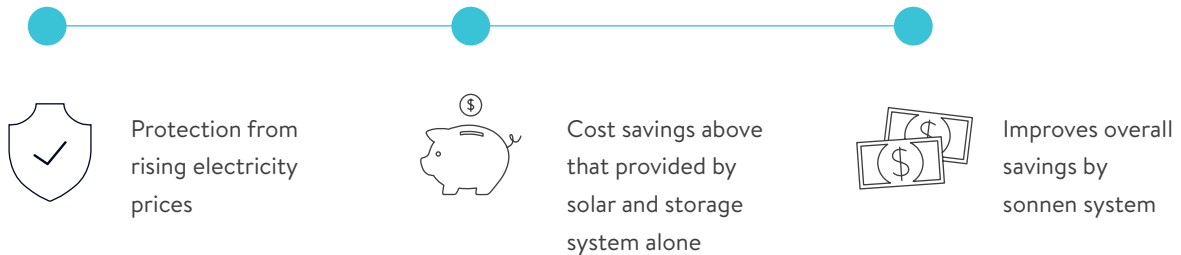

sonnenFlat is an innovative electricity tariff designed specifically for your sonnenBatterie. sonnenFlat enables households that have installed solar and a sonnenBatterie to transfer away from traditional electricity retailers to the sonnenCommunity.

Additional information regarding the sonnenFlat Energy Plans

- sonnenFlat is provided by sonnen eServices which is a business name of Energy Locals Pty Ltd.
- sonnenFlat is currently available in NSW, SA, ACT, VIC, TAS and QLD (Energex region).
- Minimum sonnenBatterie size required to join sonnenFlat is 4kWh usable battery capacity.
- For NSW customers located in Essential Energy Network an extra \$10 above the standard monthly fee package is applied.
- All prices include GST. Excess usage charges may apply.
- *Solar feed-in rate: Energy exported above the annual export threshold will be paid at the solar feed-in rate.

For further terms and conditions, please visit sonnen.com.au/energy or call 137 666.

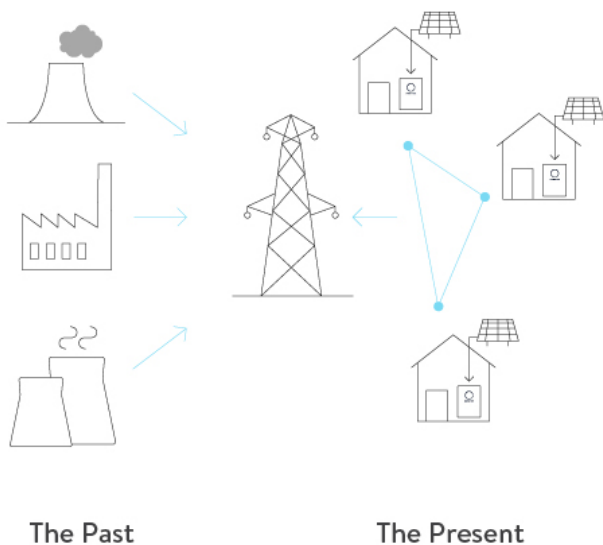

The sonnenFlat advantage.

A sonnenCommunity Comparison:

	sonnenFlat Economy Paired with solar and a sonnenBatterie	Traditional electricity Grid reliant home
Annual energy consumption	6300 kWh	5881 kWh
Annual energy cost	\$588	\$2,172
Energy usage cost	\$ 0 (under 7500 kWh)	42 c/kWh
Annual savings	\$ 1,584p.a.	\$ 0

We are providing grid stability through a virtual power plant.

Australia's energy mix is changing rapidly from largely centralised and fossil-fuel based generators to a distributed and renewable mix. Australia has one of the highest rates of rooftop solar in the world, however this surplus of solar energy has created new challenges for the grid. Without battery storage, day-time solar energy is underutilised and creates imbalances between supply and demand. sonnenFlat households are helping to this problem.

sonnenBatteries can act as a neighbourhood power plant by rebalancing supply and demand. sonnen does this by connecting sonnenBatteries around Australia with each other and operating as one 'larger' sonnenBatterie. This delivers vital grid services to keep the lights on for everyone.
